He also eventually came up with the idea of using more powerful shaped chargers and less fissionable material to greatly increase the speed of "assembly" [227] When it turned out that there would not be enough uranium-235 to make more than one bomb, the implosive lens project was greatly expanded and von Neumann's idea was implemented. Many things are easier to explain if there is than if there isn't.[74][75][76] Father Strittmatter administered the last rites to him.[23] Some of von Neumann's friends, such as Abraham Pais and Oskar Morgenstern, said they had always believed him to be "completely agnostic" [75][77] Of his deathbed conversion, Morgenstern told Heims, "He was of course completely agnostic all his life, and then he suddenly turned Catholic—it doesn't agree with anything whatsoever in his attitude, outlook and thinking when he was healthy.[78] Father Strittmatter recalled that even after his conversion, von Neumann did not receive much peace or comfort from it, as he still remained terrified of death.[78] Von Neumann was on his deathbed when he entertained his brother by reciting by heart and word-for-word the first few lines of each page of Goethe's Faust.[12] On his deathbed, his mental capabilities became a fraction of what they were before, causing him much anguish. Conversations with friends on scientific topics could go on for hours without respite, never being a shortage of things to discuss, even when leaving von Neumann's speciality in mathematics.[261] Von Neumann was not a quiet person either, he enjoyed going to and hosting parties in his home, Churchhill Eisenhart recalls in an interview that von Neumann could attend parties until the early hours of the morning, then the next day right at 8:30 could be there on time and deliver clear, lucid lectures. doi:10.2307/1968823. Goldstine says that just knowing that a proof was possible allowed von Neumann to see how to write it down even when previously he had difficulty.[273] Likewise when he had difficulties he would not labor on and struggle with them as soon as he found them, instead he would go home and sleep on it and come back later with a solution.[274] Von Neumann was asked to write an essay for the layman describing what mathematics is. However he pointed out this still did not cover an important part of the mathematical landscape, in particular, anything that involved geometry "in the global sense", topics such as topology, differential geometry and harmonic integrals, algebraic geometry and other such fields. The next question was whether it provided definitive answers to all mathematical questions that could be posed in it, or whether it might be improved by adding stronger axioms that could be used to prove a broader class of theorems.
